

Bronto Skylift Industrial Fire Applications

Performance for demanding operations

Your partner in industrial firefighting

When power meets reliability

Bronto Skylift strives to keep you and your property protected around the clock. We develop our products to maintain their usability, and perform at the market's best possible efficiency.

Many of Bronto Skylift's industrial customers have to perform in extreme environments, from chemical plants to oil refineries, to nuclear power plants and more. For this reason, we are experienced in developing and providing solutions which can live up to even the most challenging tasks, that have the highest safety and economic concerns on the line. Our vehicles are designed to meet the requirements with, for example, strong extinguishing capacity and advanced radio remote control applications.

As our partner, we will ensure that your firefighters will be able to advance on their targets quickly and safely. Further benefits can be seen from the exceptionally large water and foam capacity. The very nature of these fires makes it critical that they are controlled quickly. In addition to saving the target itself, it is crucial to prevent the fire from

spreading to the surrounding areas, where it may risk the safety of people and assets, or cause serious environmental impacts.

Bronto Skylift has created a wide range of vehicles for industrial fire brigades. WFT-units are ideal for extinguishing targets that are difficult to reach, while SE-units serve as multipurpose vehicles with their rescue platform and extremely high extinguishing capacity. In both ranges, one of the main advantages is that they can be adapted for various bodywork designs and specifications, allowing an optimal combination of the desired features.

F-WFT range key features

- Height 17–66 meters
- Very short transport length
- Water capacity of 6,000 l/min
- Remote control system available
- Can be adapted for various specifications

Saving lives and properties with massive water capacity

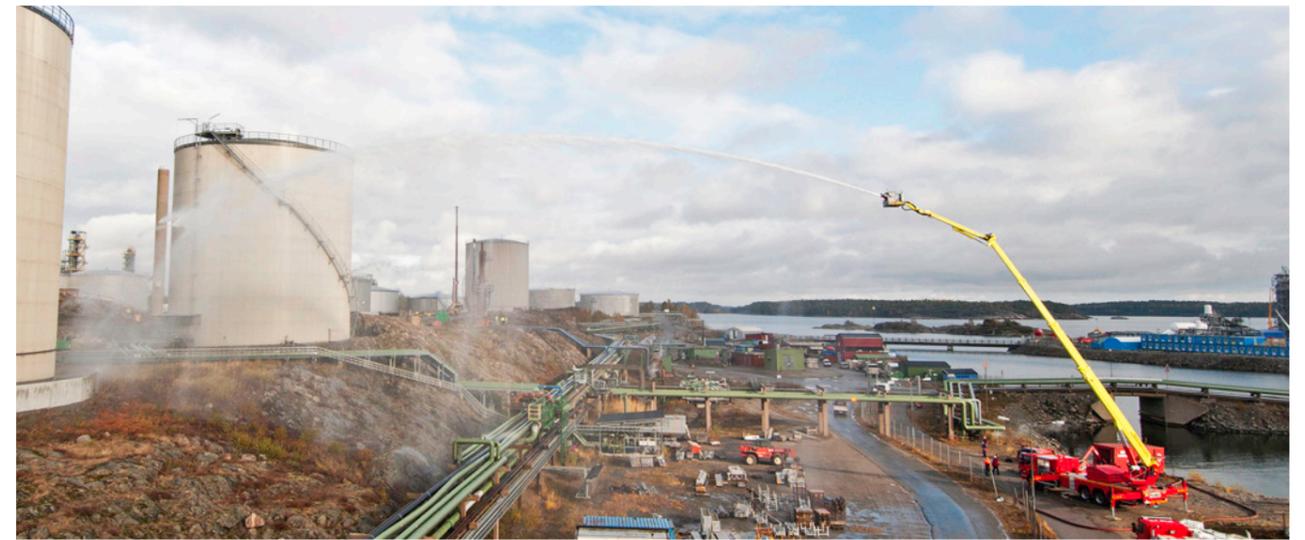

Industrial fire brigades, oil refineries and chemical plants work in dangerous conditions and they must be prepared for situations where high foam and water capacity is needed. The Bronto WFT range comprises of efficient water and foam towers for targets that are difficult to access and extinguish. It's also suitable for cooling tanks under a fire hazard, discharging an efficient 6,000 litres per minute. Bronto's radio remote control function allows operation from a safe place, without compromising performance.

Unit	Max. height	Max. horizontal reach	Up-and-over capacity	Transp. length	Water flow capacity
F17CTL	17 m	14.7 m	-	8.4 m	4,000 l/min
F40WFT	40 m	25 m	6.6 m	10.2 m	6,000 l/min
F56WFT	56 m	26.3 m	6.6 m	12 m	6,000 l/min
F62WFT	62 m	31.7 m	12.7 m	12 m	6,000 l/min
F66WFT	66 m	33.5 m	15.3 m	12 m	6,000 l/min

F-SE range key features

- Height 44 and 55 meters
- Safe rescue cage load up to 500 kg
- Water capacity of 6,000-12,000 l/min
- Remote control system available
- Can be adapted for various specifications

Be ready for duty with a **multi-purpose unit**

Bronto Super Extinguishers are specially designed for the extreme needs of industrial fire brigades. The multipurpose SE range includes the biggest rescue platform available, with maximum safe load up to 500 kg. The height-to-weight ratio beats any other aerial platform on the market, thus enabling safe operations with increased horizontal outreach and extensive up-and-over reach. The unit can be effectively used also as maintenance platform and light tower.

Unit	Max. height	Max. horizontal reach	Up-and-over capacity	Transp. length	Water flow capacity
F44RPX-SE	44 m	28 m	10.5 m	12 m	12,000 l/min
F55RPX-SE	55 m	30.4 m	10.5 m	10.8 m	6,000 l/min

Options for industrial fire

B-WRC – Wireless Remote Control

Keep your distance from the flames and step back up to 200 meters with Bronto wireless remote control system. The system allows you to master the situation while being in a safe location.

B-SEC – Wireless Surveillance Kit

Add extra eyes to the sky and have a full 360° view of the environment with a high-definition color video camera and portable tablet.

Foam and water tanks

Jump right into action with built-on tanks that can hold up to 6,000 liters depending on the implementation.

Customized quality

In addition to safety, our industrial fire solutions are strongly based on a multi-functional usability principle. All of our vehicle concepts are designed to enable flexible modification and customization according to the tasks at hand. By manufacturing the products in-house, we make sure that they serve your specified needs to the very last detail. This also guarantees that the aerial platforms, with or without the rescue cage, can adapt smoothly to your own procedures, systems and standards.

The machines are designed to be multi-standard and can be mounted on different chassis and equipped with fire pumps that meet your purposes. The optional features also include various foam mixing systems and remote controlled cameras for extended surveillance capability.

Bronto service

Bronto Skylift provides a full range of services to help you make the most of your equipment and get the benefits of our expertise. The service offering is divided according to three principles: Add value, maximize uptime and optimize performance. Included within these goals are various service options from acute problem solving to efficiency improvements and overall lifecycle care.

By evaluating your present and upcoming needs, we can create a customized service package together to meet or exceed your specific goals. This will optimize not only your performance, but streamline the use of your valuable time and financial resources.

Bronto Skylift is the global market leader in truck-mounted hydraulic platforms. We design, manufacture, sell and service appliances for rescue and firefighting, as well as for construction work.

Our product range includes approximately 50 models with a range of between 17 to 112 meters working height. The advanced modularity also allows numerous client-specific modifications. During the past 50 years, we have delivered over 6,700 platform units to fire brigades and industrial customers throughout all continents in more than 120 countries.

Our headquarters and production plants are situated in Finland. We also have subsidiaries in Germany, Sweden, Switzerland and the USA. The company is a part of Japan-based Morita Holdings Corporation.
