

Bronto Skylift F32TLK

A CITY-READY AERIAL PLATFORM

Built for municipal firefighting

The F32TLK is a compact and easily manoeuvrable aerial platform for an array of rescue and firefighting missions.

The compact design and short transportation length make the F32TLK a perfect fit for urban environments, and it is available in various weight classes with optimized outreach, with or without a rescue ladder. The F32TLK complies with the strictest European standards.

Control system to keep you safe

Everything we do, has the same fundamental goal – keep you safe while working at heights. The same principle guides our controls system, Bronto+. It is easy to use, smooth, reliable and packed with safety features that enable you to focus on your mission.

F32TLK key features

- Working height of 32 metres
- Working outreach of 25 metres (on 18t)
- Up-and-over capacity of 7,8 metres
- Water discharge capacity 2 500 litres per minute
- Versatile rescue cage with 500 kg capacity
- Superior down reach of 5,7 metres
- Transport length only 9 metres

New and improved

Everything that has made the F32TLK a trusted and reliable companion. But better.

Faster and further, up and over obstacles

The new generation F32TLK is built to race against time in narrow streets and in complex firefighting scenes. It is faster, it reaches further than ever before, and yet it has a lighter construction, allowing more capacity for your equipment.

It will get you to the rescue mission faster than ever. Automatic levelling and boom movements have been optimized to allow quick operation when seconds count and lives are at stake.

Up and over obstacles

The up and over capacity of 7.8 metres allows you to extinguish fires, rescue people, and support your team over roofs, avoiding possibly hazardous parapets and other obstacles. In addition, the below ground reach is a hefty 5.7 metres, allowing you to perform water rescues from rivers and bays.

Spacious rescue cage with everything you need

When reaching heights, you have all you need right with you, integrated. An integrated waterline, power outlets for tools, stretcher carriers, and wheel chair attachments without at-site modifications. And there is still room for you and your team member or a paramedic. The fold down rescue platform guarantees safe access to windows and balconies, while the smooth control system brings you safely close to the building.

Efficiency by customization

There are plenty of options and modifications that help tailoring the unit to fit your rescue and firefighting scenarios. For example, the optional water spray curtain below the cage keeps operators safe from the heat when operating over roofs and a diver's ladder assists in water rescue, while lighting and camera options keep you aware of the overall situation.

Standard rescue cage features

- Complete control station in the cage
- Safe cage load max. 500 kg
- Fold-down rescue platform with safety railing
- Integrated wind speed gauge with alarm system
- Safety harness attachment points at the cage
- Three doors and safe access to rescue ladders
- Operator safety devices

Various options, e.g.

- Water outlets and water monitor
- Various LED lights (blinking lights, flood lights, etc)
- Stretcher carriers and other rescue applications
- Remote control for boom movements and water monitor with additional display and WLAN connection
- Video and thermal imaging cameras with video transmission to turntable for situational awareness
- Rescue cage protection/cooling with water spray curtain
- Breathing air, electricity and hydraulics in the cage
- Generators
- Ultrasonic collision guards
- High voltage detector

(simplified selection)

Services for added safety and efficiency

For optimal performance and your safety, it pays off to take the best possible care of your Bronto platform.

The widest service network in the industry keeps you backed up wherever you are. With a Bronto Service agreement, you can be assured that your Bronto equipment is kept in the best possible condition for its entire lifetime. The content of the mutual agreement can be fully customised according to your needs. It can cover the annual inspections and service visits, but it can also include more detailed inspections, other maintenance activities, and spare parts.

When the emergency arises, confidence in operator skills is crucial. For your team's safety, our IPAF-certified field engineers provide operator and maintenance training for all new units. The content, location and the depth of the training can be tailored, and additional training is always available wherever you need it.

Advanced IoT for steady performance

Like all modern equipment, most Brontos are online too. With Bronto Compass, our service personnel can open a real time remote connection to the platform, which enables various settings and calibration of the platform. Most importantly, it enables finding, analysing and correcting faults rapidly on the go. With Bronto Compass, your team always has access to the in-depth product support that our professionals can offer.

Skyliftfleet is a tool for you to take the best care of your high-reaching team member. The web-based portal stores all the important manuals and information and serves as a handy dashboard, providing a comprehensive overview on how your platform is doing. You can find, for example, service bulletins, service cycles, and extensive usage information within Skyliftfleet.

Bronto+ control system takes care of you

Safety is about creating a safer working environment. An advanced Bronto+ control system increases safety on your worksites by letting you focus on the job at hand.

- Easy and ergonomic
- Precise, stable movements and extremely reliable outreach
- Automatic selection of the maximum allowed outreach in every direction, based on the set up and cage load
- Bronto+ displays with touch screens and tailorable menus
- Integrated help texts, quick manuals, and detailed failure codes help you in all situations

Bronto Skylift is a trusted global supplier of truck-mounted hydraulic platforms. We design, manufacture, sell and service appliances for rescue and firefighting, as well as for industrial access.

Our product range includes approximately 50 models with a range of 17 to 112 metres of working height. The advanced modularity also allows for numerous client-specific modifications. During the past 50 years, we have delivered over 7,000 platform units to fire brigades and industrial customers throughout all the continents in more than 120 countries.

Our headquarters and production plants are situated in Finland. We also have subsidiaries in Germany, Sweden, Switzerland and the US. The company is part of the Japan-based Morita Holdings Corporation.
