

Bronto Skylift S-XDT

Up for the challenge

We are always aiming higher in our mission to provide the best solution for professionals working at height. The XDT has all the key features required from a perfect aerial work platform.

These units have a telescopic cage boom, increased working load and compact design to make the work at heights more efficient and much easier, while the Bronto + control system keeps you safe and lets you focus on the job.

It's not only how high you can go with an aerial, but also how safely you do it. As always, your safety is our top priority. With our work platforms you can get where you need to be, and return home safely.

XDT key features

- Working height from 150 to 230 feet
- Working outreach up to 121 feet
- Maximum cage load of 1500 lbs
- Easy to use and precise Bronto+ control system
- Lifetime support to maintain high resale value

Added safety and efficiency

High safety does not decrease the efficiency, it does the opposite.

Control system for added safety and ease

Safety is about creating a safer working environment. An advanced control system increases the safety on your worksites by letting you focus on the job at hand.

The unit includes the Bronto 5+ control system, which provides precise and stable movements and is very simple and smooth to operate.

Thanks to a geometry-based, fully automatic outreach control system, you can be sure of reaching your targets every single day, regardless of rain, shine or wind.

Feel it in your fingers

The rugged XDT platforms will keep you steady and allow you to do the job you are up there for. Even at maximum height or outreach, the cage has unmatched stability.

To get the job done efficiently, in addition to a steady cage you need a control system that gets you close enough every time. The movements of a Bronto platform are extremely precise. Great performance and great heights, all at your fingertips.

Total lifecycle support

For optimal performance and your safety, it pays off to take the best possible care of your Bronto platform.

An aerial platform is a long-term investment. Our services ensure your aerials are connected and kept in the best possible shape for their entire lifecycle. Taking advantage of these services will help you maximise the value of your investment by maximising uptime, ensuring optimal performance, maintaining resale value, and – above all – keeping your operators and personnel safe.

Lifetime support begins when your first Bronto is delivered, starting with detailed handover training for your future operators and service personnel. Throughout the lifecycle of your Bronto, you will have access to our digital services, training, technical support, remote service, extended warranties, spare parts, maintenance, repairs, refurbishments, upgrades and rebuilds.

Bronto One

More than fleet management

Bronto One is a cloud-based portal for managing fleets and operations – a single source for all critical information. It's your single point of entry to Bronto Skylift's lifecycle services, wherever you are.

Available in three levels, Basic, Plus and Pro, Bronto One includes features from fleet management, training, worksite planning, reporting and more to streamline your operations for best performance. Basic level is free for everyone with a Bronto aerial platform in their fleet.

Bronto One Basic

Bronto One Basic provides you with an overview of your Brontos by consolidating basic unit information, manuals, info bulletins and service logs into one online hub. Get easy, instant access to these digital materials across your organisation – anytime, anywhere.

Bronto One Basic is free for all Bronto Skylift's customers.

Basic

Bronto One Plus

Bronto One Plus enables the usage data and analytics, as well as remote access to your aerial(s) for fast and accurate remote support. The usage data, analytics and insights help you reduce emissions, optimise fleet usage, and plan preventive services for maximum uptime.

Bronto One Plus is free during your warranty period.

Plus

Bronto One Pro

Bronto One Pro includes all the features in Bronto One Plus but expands on them with a powerful suite of worksite management and planning tools. It makes worksite information easily available in the office and at the worksites and provides you with powerful 3D planning tool, Bronto Duties.

Pro

Bronto Skylift is a trusted global supplier of truck-mounted hydraulic platforms. We design, manufacture, sell and service appliances for rescue and firefighting, as well as for industrial access.

Our product range includes approximately 50 models with a range of 90 to 341 feet of working height. The advanced modularity also allows for numerous client-specific modifications. During the past 50 years, we have delivered over 8,000 platform units to fire brigades and industrial customers throughout all the continents in more than 120 countries.

Our headquarters and production plants are situated in Finland. We also have subsidiaries in Germany, Sweden, Switzerland and the US. The company is part of the Japan-based Morita Holdings Corporation.
