

Bronto Skylift S-XR

Get where you need to be

We believe in continuous improvements and are always aiming higher in our mission to provide the best solution for professionals working at heights. The XR range is a great example of our customer-oriented product development as it is designed by the operators for the operators.

Quite simply, our XR range machines do more for less. They reach higher and further, reduce operational costs and increase productivity. They have less weight and lower fuel consumption, as well as larger working envelope per gross vehicle weight tonne. And as always, your safety is of paramount importance. With Bronto Skylift platforms you can get where you need to be, and return home safely.

XR key features

- Working height up to 230 feet (depending on model)
- Working outreach up to 131 feet
- Larger work envelope for maximum productivity
- Optimised transportation dimensions and weight
- Reduced cost of ownership
- Easy to use and precise Bronto+ control system
- Lifetime support to maintain high resale value

Extremely reliable outreach.
You always know how far you can
reach; this is not affected by external
circumstances.

Optimised transport
dimensions for easy manoeuvrability
on the road.

Larger working envelope for improved
productivity

Reduced cost of ownership

The Sky-Jib with automatic and manual
operation provide additional flexibility.

Fully variable jacking and fast
automatic levelling. You get up in the
air within minutes.

Various options from different cages
and material handling devices to power
outlets in the cage.

Modern service tools and a wide
service network to guarantee the
best possible uptime.

Added safety and efficiency

High safety does not decrease the efficiency, it does the opposite.

Control system for added safety and ease

Safety is about creating a safer working environment. An advanced control system increases the safety on your worksites by letting you focus on the job at hand.

The unit includes a 5th-generation Bronto+ control system that provides precise and stable movements. It has a resistive touch screen and is very simple and smooth to operate.

For added safety, the cage control centre has also a crushing hazard protection for the operator.

Easy and flexible user interface

Navigation through the control system has never been easier. The main menu has all the features and it can be modified by adding or removing icons much like in a smartphone.

Other features making day-to-day working easier include contextual help texts, integrated quick manuals, more detailed failure codes, simplified access to the cage load and easy control of the working lights.

Even the remote control has gone online and can now be equipped with an additional display with all the functions.

Total lifecycle support

For optimal performance and your safety, it pays off to take the best possible care of your Bronto platform.

An aerial platform is a long-term investment. Our services ensure your aerials are connected and kept in the best possible shape for their entire lifecycle. Taking advantage of these services will help you maximise the value of your investment by maximising uptime, ensuring optimal performance, maintaining resale value, and – above all – keeping your operators and personnel safe.

Lifetime support begins when your first Bronto is delivered, starting with detailed handover training for your future operators and service personnel. Throughout the lifecycle of your Bronto, you will have access to our digital services, training, technical support, remote service, extended warranties, spare parts, maintenance, repairs, refurbishments, upgrades and rebuilds.

Bronto One

More than fleet management

Bronto One is a cloud-based portal for managing fleets and operations – a single source for all critical information. It's your single point of entry to Bronto Skylift's lifecycle services, wherever you are.

Available in three levels, Basic, Plus and Pro, Bronto One includes features from fleet management, training, worksite planning, reporting and more to streamline your operations for best performance. Basic level is free for everyone with a Bronto aerial platform in their fleet.

Bronto One Basic

Bronto One Basic provides you with an overview of your Brontos by consolidating basic unit information, manuals, info bulletins and service logs into one online hub. Get easy, instant access to these digital materials across your organisation – anytime, anywhere.

Bronto One Basic is free for all Bronto Skylift's customers.

Basic

Bronto One Plus

Bronto One Plus enables the usage data and analytics, as well as remote access to your aerial(s) for fast and accurate remote support. The usage data, analytics and insights help you reduce emissions, optimise fleet usage, and plan preventive services for maximum uptime.

Bronto One Plus is free during your warranty period.

Plus

Bronto One Pro

Bronto One Pro includes all the features in Bronto One Plus but expands on them with a powerful suite of worksite management and planning tools. It makes worksite information easily available in the office and at the worksites and provides you with powerful 3D planning tool, Bronto Duties.

Pro

Bronto Skylift is a trusted global supplier of truck-mounted hydraulic platforms. We design, manufacture, sell and service appliances for rescue and firefighting as well as for industrial access.

Our product range includes approximately 50 models with a range of 28 to 104 metres of working height. The advanced modularity also allows for numerous client-specific modifications. During the past 50 years, we have delivered over 8,000 platform units to fire brigades and industrial customers throughout all the continents in more than 120 countries.

Our headquarters and production plants are situated in Finland. We also have subsidiaries in Germany, Sweden, Switzerland and the US. The company is part of the Japan-based Morita Holdings Corporation.
