Safety above all

Bronto Skylift F28ALR

VERSATILE 3 IN 1 FIRST RESPONSE UNIT

3 in 1
Fire truck
+
Aerial platform
+
Rescue ladder

Ready for any rescue mission

Every emergency situation is unique. When a rescue mission has been launched, and you don't fully know what you are up against, the F28ALR is the answer.

For over 50 years we have developed reliable aerial ladder platforms for firefighters. The new first response unit now includes everything you need: a fire truck, an aerial platform and a rescue ladder.

F28ALR key features

- Fire truck for a large crew
- Working height 28 metres
- Working outreach 20 metres
- Water spraying capacity 3,500 litres per minute
- Spacious rescue cage with 350 kg capacity
- Rescue ladder with fixed handrails

Be faster...

When minutes count, the Bronto Skylift F28ALR first response unit takes you to the emergency site quickly.

Quick to deploy, easy to set-up

Shortest transportation length in 28 metre class makes the unit compact and quick to manoeuvre in ordinary traffic and city streets.

The unit has variable jacking, which makes it ideal for working in confined spaces and narrow streets.

Due to the latest technology, the unit is up and functional within minutes.

Efficient and accessible

The heart of the platform is its water system that discharges water at an outstanding 3,500 litres per minute.

The F28ALR can be used as a regular fire truck. The water system can be situated in the back of the platform, enabling easy access even in the transport position.

As the water system is situated in the back, it does not take up space in the equipment lockers.

The primary water and foam tanks can be adjusted to local requirements, for example 2,000 litres of water and 200 litres of foam.

Any commercial pump of your choice can be fitted on the platform.

... and safer

Our priority is that firefighters can focus on their work in tough environments and always return home safely.

Safely up and down in a rescue cage

The spacious and well-equipped rescue cage with 350 kg capacity can be equipped with integrated outlets for water, breathing air, hydraulics and electricity.

We can also supply accessories such as a stretcher, to provide additional assistance in the cases of elderly, disabled or injured persons.

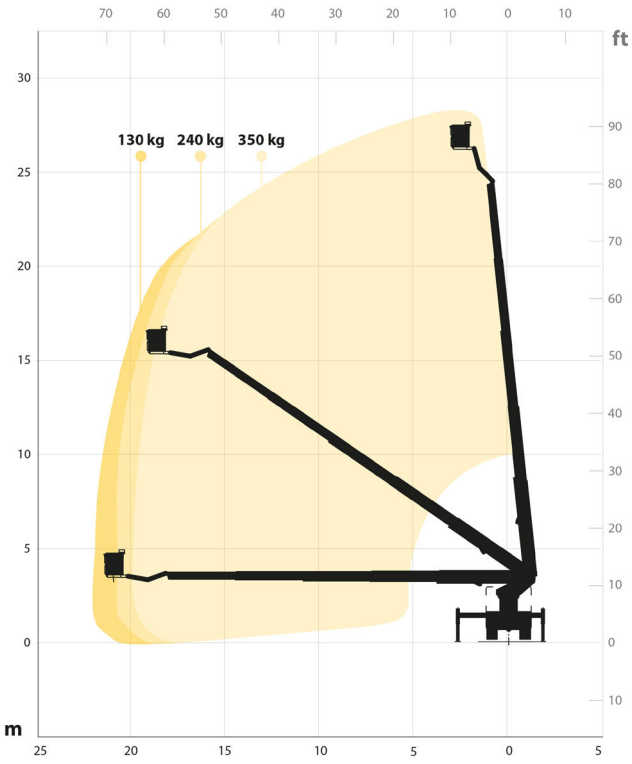

The cage comes with heavy duty EN795 compliant safety harness attachment points as standard.

Control system for added safety

Safety is not just about fulfilling the standards, it's also about creating a safer working environment. An advanced control system increases the safety of your mission by letting you focus on reaching the job at hand and working at heights.

The unit includes a 5th generation Bronto+ control system that provides precise, smooth and stable movements even in the most severe operating conditions.

The advanced control system can be used with a resistive touch screen or regular push buttons, so it's always operatable with even the thickest of gloves.

Total lifecycle support

For optimal performance and your safety, it pays off to take the best possible care of your Bronto platform.

An aerial platform is a long-term investment. Our services ensure your aerials are connected and kept in the best possible shape for their entire lifecycle. Taking advantage of these services will help you maximise the value of your investment by maximising uptime, ensuring optimal performance, maintaining resale value, and – above all – keeping your operators and personnel safe.

Lifetime support begins when your first Bronto is delivered, starting with detailed handover training for your future operators and service personnel. Throughout the lifecycle of your Bronto, you will have access to our digital services, training, technical support, remote service, extended warranties, spare parts, maintenance, repairs, refurbishments, upgrades and rebuilds.

BRONTO SKYLIFT

Safety above all

Bronto Skylift is a trusted global supplier of truck-mounted hydraulic platforms. We design, manufacture, sell and service appliances for rescue and firefighting, as well as for industrial access.

Our product range includes approximately 50 models with a range of 28 to 104 metres of working height. The advanced modularity also allows for numerous client-specific modifications. During the past 50 years, we have delivered over 8,000 platform units to fire brigades and industrial customers throughout all the continents in more than 120 countries.

Our headquarters and production plants are situated in Finland. We also have subsidiaries in Germany, Sweden, Switzerland and the US. The company is part of the Japan-based Morita Holdings Corporation.
